

“Boolean Tricks” with Logical Operators

Boolean Coercion via double NOT (double bang) operator

!!

e.g. !!“”, e.g. !!1

false, true

Default value assignment via OR operator

||

e.g. const name = somelInput || ‘Max’

somelInput if not falsy, ‘Max’ otherwise

Use value if condition is true via AND operator

&&

e.g. const name = isLoggedIn && ‘Max’

‘Max’ is set if isLoggedIn is true, false otherwise
