

Conditional Expressions / Ternary Operator

if statements return no values!

This will NOT work!

```
const userName = if (isLogin) {  
  return 'Max';  
} else {  
  return null;  
}
```

Use the ternary operator in such cases

```
const userName = isLogin ? 'Max' : null
```

Condition (can be written
exactly like in if statements)

Value if condition is
true / truthy

Value if condition is
false / falsy
